## SKILLS

TypeScript • JavaScript •  
React • Next.js •  
Redux, Redux Toolkit •  
MobX • Zustand •  
React Router • React Query •  
React Hook Form • Zod •  
Material UI • Tailwind CSS •  
styled-components • Jest •  
React Testing Library •  
HTML/CSS • Sass/SCSS •  
Git • GitHub • GitLab •  
Figma • Scrum •  
Agile Methodologies • Jira

## LANGUAGES

English - B2  
Russian - Native

## COURSES

**The Ultimate React Course 2024:  
React, Redux & More**  
*Udemy*

**The Complete JavaScript Course  
2023: From Zero to Expert**  
*Udemy*

## PROFILE

I'm am a front-end developer with over 1.5 years of experience in building responsive and accessible user interfaces for a variety of platforms using TypeScript, React and Next.js.

Proficient in collaborating with multinational cross-functional teams and ensuring smooth communication and development process through Agile methodologies. Have experience mentoring new team members.

Committed to maintaining code quality. Passionate about translating designs into pixel-perfect implementations and creating seamless user experiences across devices.

I effectively prioritize tasks, have excellent conflict resolution and problem-solving skills. Proactive in coming up with ideas on how to optimize the development process.

## PROFESSIONAL EXPERIENCE

### Front-end Developer

*Andersen People*

01/2025 – 10/2025

### Projects

#### Online fintech platform

##### Responsibilites:

- Participating in Scrum ceremonies to support iterative delivery. Tracked tasks in Jira
- Translated Figma mockups and user stories into responsive, accessible, and modular components using Next.js and Material UI
- Worked closely with BA and UI/UX teams to help create detailed user stories with clear requirements and acceptance criteria for the team
- Collaborated with QA to reproduce, analyze, and resolve bugs, improving release quality and accelerating release timelines
- Contributed to project documentation, including i18n guidelines and style conventions
- Maintained and refactored the existing codebase to enhance performance
- Participated in code reviews to uphold code quality and enforce stylistic consistency on the project
- Built unit tests with Jest and React Testing Library to ensure the project target coverage consistently stays above 80%
- Provided technical support and ongoing maintenance for deployed applications and infrastructure

##### Technologies and tools used on the project:

TypeScript, React, Next.js, React Query, Material UI, React Hook Form, Zod, Zustand, Jest, React Testing Library, HTML, CSS, Git, GitLab, Figma, Jira

## EDUCATION

### Ecologist

ISEI BSU

2012 – 2016

### E-commerce platform

#### Responsibilities:

- Contributed to Agile development cycles, including sprint planning and task tracking in Jira
- Implemented adaptive, modular UI from Figma mockups using React and Tailwind CSS
- Implemented state management with Redux Toolkit
- Partnered with QA engineers to reproduce, analyze, and resolve bugs, improving release quality and accelerating release timelines
- Participated in code reviews to maintain high-quality standards across the codebase
- Developed unit tests to ensure stability in core components

#### Technologies and tools used on the project:

TypeScript, React, Redux Toolkit, React Query, React Hook Form, Zod, Tailwind CSS, Jest, React Testing Library, HTML, Git, GitLab, Figma, Jira

### Front-end Developer

Freelance

11/2023 – 08/2024

Collaborated with UX/UI designer to develop and deliver responsive and accessible landing pages for various businesses and mobile apps based on Figma designs.

This collaboration helped me develop precise attention to detail, allowing me to recreate the Figma mockups with pixel perfect accuracy.

#### Technologies and tools used:

HTML, CSS, JavaScript, React, Tailwind CSS, VS Code, Vite, Figma

### Internship, Front-end Developer

Evolution TypeScript Bootcamp

01/2023 – 05/2023

Acquired knowledge of TypeScript, React, Redux, MobX, Git, PixiJS, Babylon.js, Unit Testing. Collaborated with other front-end developers on various tasks.

During the last two weeks of the bootcamp I designed, built and presented a final project using the TypeScript, React and MobX.
